PROFESSIONAL SUMMARY

Cloud Engineer with **7+ years** building and operating production software and cloud platforms on AWS. **Claude Code is my primary development environment**: I run multiple agents in parallel on well-scoped tasks, critically review their output, and own every line that reaches production. I build **agentic workflows and Model Context Protocol (MCP) servers deployed on Amazon Bedrock and Bedrock AgentCore**, connecting large language models to tools and internal systems and turning repeated manual investigation work into automated, tested checks. I translate non-engineering stakeholders' workflows into technical plans, write design docs and decision records, and run hands-on enablement for engineers and non-engineers alike. **Claude Certified Associate (CCAO-F)**, **13x AWS Certified (Golden Jacket)**, and an experienced technical interviewer (**70+ interviews**).

TECHNICAL SKILLS

- **Agentic development:** Claude Code (daily, multi-agent, production work), AGENTS.md/CLAUDE.md conventions, custom skills, slash commands, hooks, subagent design; Kiro, Amazon Q Developer
- **LLMs & agents:** Model Context Protocol (MCP) servers and clients, tool use, agent loops, context and retrieval design, prompt and workflow design, Amazon Bedrock, Bedrock AgentCore, Knowledge Bases / RAG, Guardrails
- **Cloud & infrastructure (AWS):** Elastic Container Service (ECS), Lambda, Relational Database Service (RDS), API Gateway, IAM, VPC, CloudWatch; Terraform, CloudFormation, AWS CDK; Docker, Amazon EKS
- **Languages & APIs:** Python, JavaScript/Node.js, SQL, Bash; REST API design, authentication and authorization, secure handling of customer and business data
- **CI/CD & quality:** Git, merge requests/pull requests, GitHub Actions, GitLab CI, CodePipeline, CodeBuild, CodeDeploy; unit testing (Jest, Python unittest), code review, runbooks and documentation for handoff
- **Observability:** CloudWatch, Prometheus, Grafana, Datadog

PROFESSIONAL EXPERIENCE

Cloud Support Engineer II · Amazon Web Services, Hyderabad

May 2021 – Present

- **Designed and built internal diagnostic tooling (JavaScript/Node.js)** for support engineers: a troubleshooting dashboard and an automated issue detector that replaced manual, repetitive investigation steps across the team, cutting time to diagnose common issues. Took it from design doc and engineering review through implementation to **98 unit tests at 95% coverage** and code review, with documentation for team handoff; an **MCP interface** so AI assistants can use the tool is planned next.
- **Build and troubleshoot agentic and generative AI solutions on Amazon Bedrock and Bedrock AgentCore**, including AI agents and **MCP servers** that connect large language models to tools and APIs, in production for enterprise customers.
- **Run Claude Code and AI coding agents (Kiro, AWS DevOps agent) as my primary development environment** for day-to-day engineering work, and drive their adoption across the organization through technical articles and hands-on workshops for engineers.
- **Troubleshoot AI agent integrations for enterprise customers**, including connecting MCP servers for observability and ticketing tools, and resolving webhook, authentication and connectivity issues.
- **Build Python and AWS SDK tooling** that turns repeated manual investigations into automated, tested checks for support engineers, reducing time spent on repetitive diagnostic work.

- **Own the customer experience for an AWS CI/CD service** as cross-team point of contact: author operational playbooks and runbooks, and turn recurring customer issues into product fixes and documentation with the service team.
- **Resolve complex production issues** for enterprise customers across **200+ deployments** (ECS/EKS, Lambda, networking, CI/CD); **led customer recovery during a large-scale service event affecting thousands of customers**.
- **Advise customers on architecture and release safety** (Blue/Green and Canary deployments) and helped them achieve **~40% lower cloud spend and 99.9% uptime**; reproduce customer environments with Terraform, CloudFormation and AWS CDK to isolate failures.
- **Mentor and hire:** conducted **70+ technical interviews**; train and onboard engineers through workshops, translating their workflows and pain points into technical tooling; subject-matter expert in AWS CI/CD services and Elastic Beanstalk.

Cloud Engineer · **Deloitte (US Offices), Hyderabad** *Jan 2021 – May 2021*

- Designed and deployed **20+ AWS Lambda microservices** with automated CI/CD, reducing operational overhead by ~30%.
- Built modular **Infrastructure as Code (CloudFormation/CDK)**, keeping staging and production consistent.

Software Engineer · **Accenture Solutions Pvt Ltd, Hyderabad** *Aug 2019 – Jan 2021*

- Built automation tooling on the **Spring Framework (Java)**, improving system performance by ~80%.
- Containerised applications with **Docker** and helped teams mature their CI/CD practices.

CERTIFICATIONS

Anthropic: Claude Certified Associate – Foundations (CCAO-F), Sep 2026
AWS (13x): Generative AI Developer – Professional · Solutions Architect – Professional · DevOps Engineer – Professional · Machine Learning – Specialty · Advanced Networking – Specialty · Machine Learning Engineer – Associate · Data Engineer – Associate · CloudOps Engineer – Associate · SysOps Administrator – Associate · Developer – Associate · Solutions Architect – Associate · AI Practitioner · Cloud Practitioner
Microsoft: Azure Fundamentals (AZ-900)

AWARDS

- **Most Valuable Player (×2)**, 2023 and 2025 · **Mentoring & training award (×3)**, most recent 2026 · **Knowledge-sharing award**, 2023

EDUCATION

B.E., Electronics & Telecommunication Engineering, Sinhgad Academy of Engineering, Pune (Savitribai Phule Pune University) · CGPA 8.25 · First Class with Distinction
